

The point of view of the enterprise: **Skype**

We are different

This is why universities and businesses complement each other

It's about our attitude

1. Towards time
2. Towards results
3. Towards intellectual property

**We are all members
of the society**

We need to work together

1. People
2. Research
3. Development

What makes a good university?

1. To what extent the university appreciates the differences
2. How much graduates know about the real world
3. How much politics is there

Thank you!
