NEGAVATT CONTEST

- Catch negavatts from transport and food, water and paper, electricity and heat. We reduce the savings to the non-renewable primary energy amount, so that we could compare the ideas.

ENERGY IS NEITHER CREATED NOR DESTROYED, BUT CONVERTED FROM ONE FORM TO ANOTHER

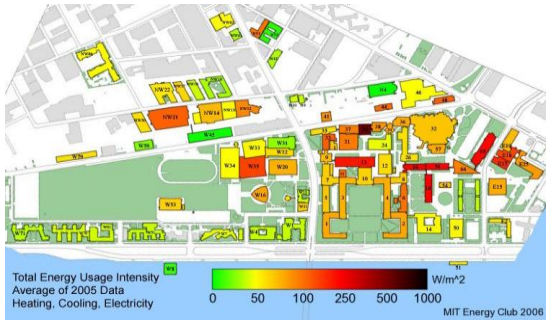
The same energy amount could take a car to Kose, a bus to Tartu, and a train to Valga.

1 l of tap water = **500 x less** energy than 1 l of bottled water

What has been done elswhere?

e-bicycle sharing

Visualising energy consumption



Offering local food in the canteen

Clean energy fund and annual idea contest

THE UNIVERSITY OF VERMONT
CLEAN ENERGY FUND
A STUDENT INITIATIVE
