## SUSTAINABILITY AT THE UNIVERSITY OF LISBON

*"What you learn at the university, what we live here, defines much of what we are and what we are going to be."*

António Sampaio da Nóvoa,  
Rector of the University of Lisbon.

## SUSTAINABILITY AT THE UNIVERSITY OF LISBON

### KEY IDEAS

- Reducing the environmental impact of the UL is an issue that should go on the agenda;
- In academia, other universities already have a sustainability strategy;
- The exemplarity required to academia in this area, particularly by direct contact with future generations.

## SUSTAINABILITY AT THE UNIVERSITY OF LISBON

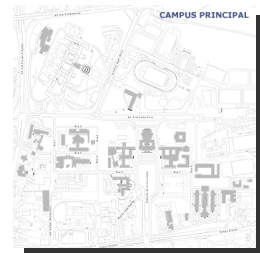

### CAMPUS UL

#### Our Mission

Provide an efficient and sustainable service to the University.

#### Our View

Management towards a responsible UL Campus.

## SUSTAINABILITY AT THE UNIVERSITY OF LISBON

### CAMPUS UL

#### Our Goals

- Lead by example through an engagement with the UL sustainable development agenda;
- Engaging the academic community to a change in behavior;
- Promoting sustainability by raising awareness and implementing measures aimed to rationalize resources;
- Communicate policies and initiatives related to sustainability and its progress;
- Monitor legal compliance.

## GREEN PRATICES

## GREEN PRATICES

### ENERGY

#### MEASURES FOR REDUCING ELECTRICAL CONSUMPTION

- Dissemination of a set of measures to be implemented at the various Faculties of the University of Lisbon;
- Contribute to a reduction in electricity and gas consumption.

## GREEN PRATICES

### ENERGY

#### PLATFORMS FOR DEVELOPING BEST PRACTICES ON ENERGY EFFICIENCY

"Green Campus – Challenge for Energy Efficiency in Higher Education"

Aims to involve students and faculty staff in the sector of higher education to develop innovative energy efficiency measures (both technical and behavioral), with an impact on reducing consumption in buildings of the participating institutions.

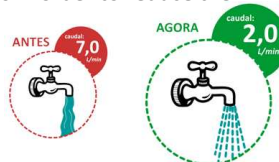

## GREEN PRATICES

### WATER

#### REDUCE WATER CONSUMPTION

In order to reduce water consumption, the University of Lisbon implemented a pilot project at the Institute for Interdisciplinary Research.

- The project consisted of installing flow reducers on taps in order to reduce the waste with water consumption.

## GREEN PRATICES

### MOBILITY

#### 6M<sup>2</sup> - MOBILITY IN UL

Reorganization of the public space of the Campus .

Promote user awareness to the importance of planning the Campus area of and around the parking lot.

#### PLANNED ACTIONS TO BE TAKEN BY UNIVERSITY OF LISBON

- Improved signage** of UL parking;
- Standardize the conditions of use of the parks managed by the faculties;
- Awareness campaigns** for the use of alternative transportation;
- Measures for the encouragement of **bicycle use on Campus**.

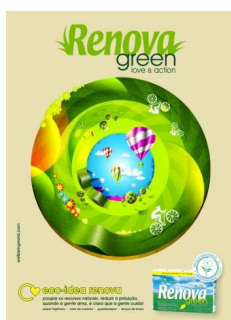

## GREEN PRATICES

### WASTE

#### RENOVA (RENEW) YOUR PAPER AT UL

Promotes a rational use of paper, as well as its recovery.

This action aims to promote the collection of discarded paper in exchange for toilet paper, 100% recycled product (RenovaGreen).

## GREEN PRATICES

### REQUALIFICATION

#### A DOOR TO THE UNIVERCITY (UNIVERSITY/CITY)

Participatory budget of the Lisbon Municipality

Urban Requalification Project of the University Campus
