UNA EUROPA STRATEGIC GOALS

The creation of a **University of the Future as an international, value-driven, innovative community that is open and inclusive**, whose foundation lays within the large and diverse group of academic and non-academic experts of Una Europa universities.

The consolidation of **Una Europa as a European University ecosystem**, where communities of practice are being built **with management and support services actively serving our common mission**, central to the successful creation of innovative formats for courses/programmes and mobility.

The development of **Joint Innovative Formats for international education and mobility**, to be tested and evaluated via the **implementation of pilots** on which project teams work according to 1Europe workflow and timeline.

The contribution to **governmental and European policies to optimize regulations, to promote internationalization and to strengthen the EHEA**, facilitated by strong links with European stakeholders and policy makers, as well as a coherent sustainability strategy.
