Please note that participation is free, but registration is required.

Registered participants will receive an automatic notification with the link to join the webinar

Concept note

Research data management is a key pillar of Open Science. Among the eight ambitions of the European Union OS policy, some integrate the data at their core: Open Data sharing according to FAIR principles, research integrity and reproducibility of scientific results and the creation of European Open Science Cloud (EOSC).

In order to make those a reality, it is crucial for the researchers to be supported during the research data lifecycle, from planning, storing, to publishing and sharing, as well as to preserving the data.

Librarians are increasingly trained and ready to play a decisive role.

However, huge challenges are still to be tackled. Beyond technical issues, such as storing needs or platforms interoperability, intellectual property rights and data protection are boundaries to be taken into account.

UNICA SCHOLARLY COMMUNICATION WEBINAR

“Research Data Management”

Promoted by the University of Vienna

11 October 2022, 14:30– 16:00 pm CEST

Working Programme

Chair: Raul Aguilera, Head Librarian, Universidad Carlos III de Madrid and Coordinator of the UNICA Scholarly Communication Working Group
